

fashion designer

hello,

An innovative fashion designer who has more than nine years of experience in the industry. Proficient in various design software and use them on various fashion projects. Has been involved in various projects and collaboration with many clients and big companies to deliver seasonal products and projects. Excellent in problem identification and creation of the most efficient solution. Reviewing and knowledgeable about the latest fashion trend and development. Fashion is like breathing, in which I can't live without it. It is also my passion. So, I would love to share this with your company and developers in best practices and design patterns

Software Development Engineer

CloudTech Solutions Pvt. Ltd. | Jan 2024 - Present

- Architected and deployed microservices-based e-commerce platform serving 500K+ daily users
